

Maximum earnings.
In any weather.

Fronius **IG Plus**

The new generation mains-connected PV inverter

The aim was clear: use every ray of sunshine to maximum effect. The maximum level of efficiency is not necessarily the most critical factor. The intelligent interaction of various other factors is far more important. A constant efficiency rating over a wide input voltage range, for example, and a rapid and precise response to the smallest change in the weather. Plus reliable, uninterrupted operation. The new Fronius IG Plus generation of inverters combines all these factors. With performance classes from 3.5 to 12 kW. For maximum yield in any weather.

**Fronius IG Plus 35 /
Fronius IG Plus 50**
Strong and compact. Both one-phase devices have an output power of 3.5 to 4 kW for photovoltaic systems, e.g. for single-family homes.

**Fronius IG Plus 70 /
Fronius IG Plus 100**
The two-phase connection ensures a negative phase sequence current under 4 kVA. Output power of 6.5 to 8 kW.

**Fronius IG Plus 120 /
Fronius IG Plus 150**
Maximum strength. Three phases in a device for mega-systems. Available with a power output of 10 to 12 kW.
